Deadbolts

Designed in Australia, the Lockwood range of deadbolts is manufactured according to stringent quality specifications to provide a complete range of security solutions for both the commercial and residential markets.

Paradigm 005 Deadbolts

The Paradigm 005 Deadbolt range represents the pinnacle in deadbolt security products. Incorporating innovative safety features including Safety Release, LockAlert and DualSelect, the Paradigm range is ideal for residential and architectural applications.

Symmetry Deadbolts

With advanced security features, the Symmetry range of deadbolts feature traditional styling and are available in a range of finishes to complement the Symmetry door furniture range. The Symmetry suite of door furniture and deadbolt products allow you to create an integrated look throughout the home.

Keeler Hardware

Paradigm 005 Deadbolt

Paradigm 005 Deadbolt – Safety features

Secure Mode
Locked from both inside and outside

Safety Mode
Locked from outside and free to exit from inside

Passage Mode
Free to enter from outside and free to exit from inside

Paradigm 005 Deadbolt

DualSelect Locking

Two external locking modes – Safety Mode and Secure Mode.

By rotating the key 90° the bolt can be thrown achieving external security whilst the internal turnknob is free to exit (**Safety Mode**).

By rotating the key a further 45° to the second click, the bolt will now be secure on both sides of the door (**Secure Mode**).

SafetyRelease

SAFETYRELEASE automatically unlocks the internal knob upon entry. This minimises the risk of being locked inside in the case of an emergency.
LockAlert

The Paradigm 005 Deadbolt also has the unique Lockwood *LOCKALERT* status indicator that shows at a glance the lockset mode. The lockset can operate in three modes: **Secure Mode**, **Safety Mode** and **Passage Mode**.

Counterbalance Bolt

The Paradigm 005 Deadbolt has been designed to achieve the highest possible Australian Standard door lock security rating via the Counterbalance Bolt, which proportionally distributes the load between the door and door frame.
